Endpoint response to signed initial stress
(a) Initial radiation-stress slice
×10⁻⁴
Endpoint signed shear contribution
Matter memory
Radiation memory
Saved signed shear
Initial signed Π_{r,F}
×10⁻³
(b) Initial matter-stress slice
×10⁻⁵
Endpoint signed shear contribution
Matter memory
Radiation memory
Saved signed shear
Initial signed Π_{m,F}
×10⁻⁴
Collisionless finite-owner LRS Bianchi I · same normal frame · z̄ = 20 → 2
Full Frobenius = √2 × half-contraction; both slices: Σ₀ = 0; the other initial stress is approximately zero
